

Ceypetco Power Steering Fluid

Description

Ceypetco PSF is a premium power steering fluid formulated using high quality base stock and additive package to provide optimum protection in power steering systems of most models of vehicles.

Applications

Ceypetco PSF is ideal for use in the hydraulic power steering systems of most domestic and imported vehicles. It is also suitable for use in applications where Dexron III or Mercon is required.

Benefits

- Helps prevent leaks
- Provides controlled seal swelling properties
- Resists foaming, oxidation, corrosion and rusting.
- Provides smooth power steering operations.

Typical Characteristics

Properties	PSF
Appearance	Bright & Clear
Color	Red
Density at 15°C Kg/L	0.8595
Viscosity at 40°C, cSt	43.6
Viscosity at 100°C, cSt	8.0
Viscosity Index	160
Pour Point, °C	-30

Performance:

- Exceeds performance requirements of GM 99850
- Ford M2CI28D

Health, Safety and Environment

Based on available information, this product is not expected to produce adverse effects on health when used for applications referred to above and the recommendations provided in the Safety Data Sheet (SDS) are followed. SDS's are available upon request through your sales contact office. This product should not be used for purpose other than the applications referred to above. If disposing of used product, take care to protect the environment, follow the local rules and regulations of your local Authority.

Note:

All information supplied by or on behalf of Hyrax Oil in relation to its products, whether in the nature of data, recommendations or otherwise, is supported by rigorous laboratory work and research and believed to be reliable.

Typical test data are average values only. Minor variations to typical properties not affecting the performance of the product are to be expected in normal manufacturing circumstances.
