Product Discharging Facility & Tank Capacity

Capacity of Underground Tank (liters)		Capacity of Over ground Tank (liters)		Total Tank Capacity (liters)	
---------------------------------------	--	---------------------------------------	--	------------------------------	--

Basic criteria to be fulfilled by the relevant consumer point/Corporate customer;

- i. Only non-moving installations within premises or vehicles that do not leave the premises are eligible (Strictly excluding motor vehicles that operate on public roads).
- ii. The minimum purchase volume per order must be at least 6,600 liters.

- iii. The storage tank capacity must be at least 2,000 gallons (if there are any deviations, please specify).
.....
- iv. The business must be a registered entity (applicable to the private sector only).
- v. Tanks must be steel-fabricated and possess a valid pressure test certificate. Additionally, engineering drawings must be approved by the relevant fuel supply company (please attach all required certificated and documents).
- vi. The storage facility must comply with fire, health and safety regulations and be equipped with Foam, Dry Powder and CO₂ fire extinguishers.
- vii. The bowser must have direct access to the tank location, with sufficient space for maneuverability.
- viii. Dispenser pumps are not allowed, if there are no allowed vehicles. All fuel-consuming equipment must be permanently connected via pipelines, with no loose ends. If dispenser pumps are in use, fuel issuance must be recorded.
- ix. Fuel must be used exclusively for the intended consumer and their approved purposes.

I hereby certify that the above information is true and correct to the best of my knowledge and confirm I comply with the basic stated above criteria.
